This calendar may be subject to Change

Taurus (Apr. 20 – May 20)

Happy Birthday to the zodiac's most steadfast sign! This is indeed your birthday month and this means that not only do you celebrate a special day but a special month all month long. The planetary positions now bring promises for the year ahead. Awareness is your key word for this upcoming year. People and circumstances enter your life now that open you up to new experiences in relating. That means your relationships take on new meaning. This would be all kinds of relationships: intimate, friendship, family and the world at-large. Travel is certainly amped up for you and there is much learning to be gained from those travels.

Gemini (May 21 – Jun. 20)

Is it your money, my money or our money? That question is spinning in your gray matter. Because dollars are often used as a mental stimulus for you, that question bears no threat. Rather it promises a new way of looking at resources and how to use them. Try something different this month with money. Close your eyes and try to 'feel' for your answers. This means you don't think your way through, you feel your way through. Who knows, you may come up with a new way of making decisions.

May Birthstone

·Emerald·

Thought to improve memory, faith, and intuition, **emeralds** are a symbol for constancy and true affection. Some cultures believe them to grant their owner foresight, good fortune and youth. The name emerald is derived from the Greek word 'smaragdus' meaning 'green'.
